

Marie GRENIER

Marseille University, France

MSc student in Oceanography, especially on marine environment, marine biology and ecology.

Internship & Projects in Marseille :

- **Bachelor internship** : Analysis and monitoring of the biological, physical and chemical parameters of the Berre lagoon (*Supervisor : Delphine BOTHA, Mediterranean Institute of Oceanography*)
- **Master 1 Projects** :
 - Spatial and temporal variability of biological and physico-chemical parameters of the pelagic area in Marseille bay
 - Identification of benthic communities on soft bottoms in Marseille bay
 - Hydrodynamics and dissolved oxygen distribution on the fishfarm of Frioul island

Interests in Marine Biology :

- Natural and anthropogenic impacts on marine ecosystems and biodiversity
- Pelagic ecosystem : functioning and interactions with environmental parameters

About Malta Workshop 2014 :

- Discover Maltese ecosystems and biodiversity
- Develop additional scientific knowledges
- Share knowledges with all students and scientifics
- Improve my english
